

TITLE

NURSERY TREE PIPE OR CONDUIT AND A METHOD OF MAKING THE
SAME

ABSTRACT

5 The present invention relates to an apparatus assembly for aiding in
growing trees having straight trunks comprising a tubular metal pipe or
conduit; a removable enclosing device engaged with the tubular metal pipe
or conduit; an optional removable tapered stopper engaged with the
10 tubular metal pipe or conduit, and optionally a means for connecting the
tubular metal pipe or conduit to a tree. The present invention further
relates to a method for making the tree pipe or conduit assembly.
